

1. Which of them is not a part of definition of myocardial infarction?
 - a. ECG changes
 - b. Rise and fall of Troponin
 - c. Post PCI
 - d. Shortness of breath
2. ECG leads have _____ Augmented leads.
 - a. 3
 - b. 6
 - c. 9
 - d. 12
3. The range of mildly reduced heart failure is
 - a. 50-55
 - b. 40-45
 - c. 40-50
 - d. 45-50
4. When is not a mortality benefit drug of heart failure.
 - a. Beta Blocker
 - b. Nitrate
 - c. MRA
 - d. ACEi
5. Which of these drug is not a part of treatment of stable angina.
 - a. IV nitrate
 - b. Aspirin
 - c. P2Y12 inhibitor
 - d. Beta Blocker
6. The dose of enoxaparin is
 - a. 1mg/kg OD
 - b. 1mg/kg BD
 - c. 0.5mg/kg OD
 - d. 0.5mg/kg BD
7. Which of them is not a Signs of Severe Mitral stenosis
 - a. High volume pulse
 - b. Opening Snap
 - c. S1 loud
 - d. Mid diastolic murmur
8. Which of them is not a Signs of Severe Mitral Regurgitation
 - a. Low volume pulse
 - b. Pansystolic murmur
 - c. Thrill
 - d. Heaving Apex beat
9. Raised JVP is the sign of
 - a. Right sided heart failure
 - b. Left sided heart failure
 - c. Tamponade
 - d. Constrictive pericarditis

10. Left axis deviation is due to
 - a. Left Anterior Fascicle
 - b. Left Posterior Fascicle
 - c. Right ventricular hypertrophy
 - d. Purkunji fibers
11. LBBB means more than _____ QRS
 - a. 100
 - b. 120
 - c. 150
 - d. 110
12. Murmur of Aortic stenosis at apex is called
 - a. Gallavardin Phenomenon
 - b. Austin Flint Murmur
 - c. Carey Coomb Murmur
 - d. None of the above
13. Murmur of Aortic regurgitation at apex is called
 - a. Gallavardin Phenomenon
 - b. Austin Flint Murmur
 - c. Carey Coomb Murmur
 - d. None of the above
14. Pulses paradoxes is the sign of
 - a. LVD
 - b. RVD
 - c. Temponade
 - d. Pericarditis
15. Which of these anti-coagulations has a relation with INR?
 - a. Warfarin
 - b. Apaxiban
 - c. Rivaroxiban
 - d. Aspirin
16. Which of them is a cyanotic heart disease
 - a. ASD
 - b. VSD
 - c. Ebstein Anomaly
 - d. PFO
17. Which is the sign of Coarctation of aorta
 - a. Low blood pressure
 - b. Radio radial delay
 - c. Low volume pulse
 - d. Pansystolic murmur
18. 3rd degree block means
 - a. AV Dissociation
 - b. PR prolongation
 - c. Sudden drop of QRS
 - d. Gradual increase OF PR

19. Heaving apex beat is a sign of
- Mitral regurgitation
 - Atrial regurgitation
 - Mitral Stenosis
 - Atrial Stenosis
20. Murmur of Aortic regurgitation best heard at
- 3rd left ICS
 - 2nd left ICS
 - 2nd right ICS
 - 4th left ICS
21. ST elevation in V3-V4 means
- AWMI
 - SWMI
 - IWMI
 - LWMI
22. Which drug is contraindication in RV Myocardial Infarction
- Nitrates
 - Beta Blocker
 - Ace inhibitor
 - ARB
23. Drug of choice in metallic prosthetic heart valve
- Warfarin
 - Apaxiban
 - Rivaroxiban
 - Aspirin
24. Before switching from ACEi to ARNI there should be a wait of
- 36 hours
 - 30 hours
 - 24 hours
 - 40 hours
25. Tall P wave in lead II in the ECG means
- RA dilated
 - RV dilated
 - LA dilated
 - LV dilated
